

MARTIN COUNTY SOLAR PROJECT

Rise and Shine, Martin County!

Martin County Solar Project is a 200 megawatt, two-phased, solar energy facility in Martin County, bringing many positive impacts to the local economy and community.

A solar project provides a healthy, productive economic development opportunity for local land to harvest a stable cash crop – the sun.

We are excited to be working in partnership with the Martin County community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

MARTIN COUNTY SOLAR PROJECT

The Benefits of Going Solar in Martin County:

- Impacts to the local economy through increased revenues to local governments and other services
- Boosts local business; creates new jobs during construction
- Requires minimal water consumption during construction and operations
- Clean, renewable energy has a beneficial impact on the environment
- Quiet renewable energy generator without emissions
- Hedges and stabilizes the future price of electricity through zero fuel costs
- Diversifies and decentralizes our nation's electricity grid
- Will not increase local traffic during operations or create burden on municipal services (i.e. sewer, water, emergency services, etc.)
